Stonel™ VC&C products

PRODUCT UPDATE BULLETIN PUB #10245

Stonel™ Axiom™: Actuator-Sensor Interface Version 5 (ASi-5) now available

We are excited to announce that the Stonel Axiom AN/ANX products are now available with ASi-5 featuring increased network performance and advanced diagnostics. The diagnostic information is obtained through the ASi-5 data highway for the AN98S and AN98W models. The AN98W model with wireless capabilities also features a new configuration screen.

Some of the new key features with the ASi-5 release include:

- Axiom ASi-5 has increased range over ASi-3 to 200m.
- New advanced diagnostics data available through ASi-5 highway with expanded data
 - Cycle count over limit alarm - exceeding a threshold.
 - Closed or open Stroke time over limit - exceeding a max or min time threshold.
 - Valve position open/closed limit - beyond open/closed set-point.
 - Alarms generate an “event” on the ASi-5 network that can be seen at the ASi-5 gateway, transferred to higher levels (PLC / DCS), and read by ASi-5 tools.
 - Diagnostics settings managed via ASi-5 tools or Wireless Link app.

To order, use model AN98W for the Axiom with Wireless Link support. Also, the models AN98S and ANX98S can be ordered for just ASi-5 support with diagnostics. The initial release will be for general purpose applications. ASi-5 devices can co-exist with ASi-3 devices when used with ASi-5/ASi-3 gateways that are now available. More information regarding the Axiom and ASi-5 can be found on our [website](#); including the IMO and technical bulletin. Pricing will be available in the upcoming February 10th price books and posted to Business Center. Axiom ASi-5 training will be conducted in the upcoming months.

If you have any questions, please do not hesitate to contact me, Kevin Hufnagle, or your Area Sales Manager.
