IECEx Certificate of Conformity

Certificate No.: **IECEx EESF 20.0016X**

Page 2 of 4

Date of issue: 2023-10-10

Issue No: 3

Manufacturer: **Valmet Flow Control Oy**
Vanha Porvoontie 229
Vantaa FI-01380
Finland

Manufacturing
locations:

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended

STANDARDS :

The equipment and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards

[IEC 60079-0:2017](#) Explosive atmospheres - Part 0: Equipment - General requirements
Edition:7.0

[IEC 60079-11:2011](#) Explosive atmospheres - Part 11: Equipment protection by intrinsic safety "i"
Edition:6.0

This Certificate **does not** indicate compliance with safety and performance requirements other than those expressly included in the Standards listed above.

TEST & ASSESSMENT REPORTS:

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in:

Test Report:

[FI/EESF/ExTR20.0016/02](#)

Quality Assessment Report:

[NO/DNV/QAR09.0008/14](#)

IECEx Certificate of Conformity

Certificate No.: **IECEx EESF 20.0016X**

Page 3 of 4

Date of issue: 2023-10-10

Issue No: 3

EQUIPMENT:

Equipment and systems covered by this Certificate are as follows:

Certified equipment:

VG9000H ("ValvGuard") series safety valve controllers.

1. VG9200H series, types VG92..HX..

2. VG9300H series, types VG93..HX..

VG9000H ("ValvGuard") series safety valve controllers are intended to control on/off valves in hazardous industrial areas. HART communication in 4...20 mA current loop has been utilized in the controllers. In addition to communication and power supply, the mA loop is also used as a safety control signal.

The equipment accommodates three component boards (SHART, SVCH and SA 2W), LUI (Local User Interface) module, prestage unit and limit switches (option).

PT (Position Transmitter) option for indicating valve position is a 4...20 mA current transmitter/sink with separate interface (PT Loop). LCP (Local Control Panel) option is an external pushbutton/ indicator module which can be connected to VG9000H device via LCP interface.

The maximum input values of Current Loop interface are:

$U_i \leq 28 \text{ V}$; $I_i \leq 120 \text{ mA}$; $P_i \leq 1 \text{ W}$; $C_i < 8 \text{ nF}$; $L_i < 53 \text{ }\mu\text{H}$

The maximum input values of PT Loop interface are:

$U_i \leq 28 \text{ V}$; $I_i \leq 120 \text{ mA}$; $P_i \leq 1 \text{ W}$; $C_i < 8 \text{ nF}$; $L_i < 53 \text{ }\mu\text{H}$

The maximum input values of LCP interface are:

$U_i \leq 10 \text{ V}$; $I_i \leq 100 \text{ mA}$; $P_i \leq 0,25 \text{ W}$; $C_i < 5 \text{ nF}$; $L_i < 1 \text{ }\mu\text{H}$

SPECIFIC CONDITIONS OF USE: YES as shown below:

- The maximum allowed ambient temperature range according to different T Classes are:
 - Tamb -40 °C...+50 °C for temperature classes T6 or T₂₀₀95 °C
 - Tamb -40 °C...+65 °C for temperature classes T5 or T₂₀₀110 °C
 - Tamb -40 °C...+80 °C for temperature classes T4 or T₂₀₀125 °C
- The permissible ambient temperature range depends on the used configuration. The ambient temperature range is marked on the identification plate
- At an ambient temperature $\geq +70 \text{ }^\circ\text{C}$, the temperature rating of the connection cable shall be in accordance with maximum ambient temperature range.
- For EPL Ga, the enclosure parts or enclosures made of aluminum alloy shall not be subjected to friction or impacts due to spark ignition hazard.
- The safety valve controller shall be connected according to the manufacturer's instructions.
- The safety valve controller shall not be subject to prolific charge generating mechanism by dust.
- The inputs of VG9000H shall be galvanically isolated from earth, therefore a suitably rated Exi-isolator shall be used.
