Stonel™ VC&C products

PRODUCT UPDATE BULLETIN PUB #10190

Stonel™ Quartz™ 2G, 2H, 2S, 2M (SPDT) Maxx Guard to the Dual Module

Dear Business Partner,

I am writing to inform you of important updates to the Stonel Quartz products regarding reed switches. The new Maxx Guard reed switch design is an integrated Dual module design that provides a cleaner integrated look and sealed terminal strip.

Stonel Quartz Maxx Guard switch moving to Dual Module Design

- The Quartz individual Maxx Guard sensor is moving to a new Dual Module design. Changes are for the single-pole double-throw (SPDT) Quartz reed switches, function options 2G, 2H, 2S, and 2M.
- The new Maxx Guard Dual Module incorporates 2 SPDT reed switches into one package providing a more lean and clean integrated design that will begin shipping in Q2, 2024.
- The new Dual Module switches have the same ratings as the previous Maxx Guard reed switches.
- For applications requiring more than one solenoid, a three-conduit entry unit will be required to provide extra termination points in the unit.
- The new Dual module cannot be retrofitted into existing Maxx Guards, but individual Maxx Guard sensors will still be available as a repair component.

If you have questions on the life cycle status of these products or need help with selection or ordering, please contact me or Kevin Hufnagle.
