Stonel™ VC&C products

PRODUCT UPDATE BULLETIN PUB #10390

Stonel™ Quartz™ modules and VCTs updated to new leaner design

Dear Business Partner,

I am writing to inform you of important updates to the Stonel Quartz products regarding the 35, 45, 92, 96, and 97 function modules. The Stonel Quartz will be shipping with new modules and valve communications terminals (VCTs) for Quartz QN, QX and QC models. The new modules will look slightly different due to a different potting shell (clear material vs. gray), but **form and function** remain the same.

- The new modules with the clear potting shell will begin shipping in May 2025.
- The new modules have the same ratings and specifications as the previous modules, and the shaft/cams assembly remains the same.
- The new modules have a slightly different footprint and will mount on different threaded holes in the Quartz housing.
- The new modules **cannot** be retrofitted into Quartz built before mid-2022 since the mounting footprints are different, but new individual modules and adapters will be available as repair components as needed.
- Quartz built after mid-2022 have **both sets** of mounting holes for old and new modules and thus don't require an adapter.

If you have questions regarding the Quartz dual modules or need help with ordering, please contact me or Kevin Hufnagle.

Best Regards,

Bruce Domino, P.E.
