Stonel™ VC&C products

PRODUCT UPDATE BULLETIN PUB #10392

Android application for Stonel™ Wireless Link app tool now available

We are excited to announce that the Android application for our Wireless Link tool is now available with all the key features of the existing iOS application. Some of the devices and features the Wireless Link Android application will support:

- Stonel Axiom™ (AN), Eclipse™ (EC) and Prism™ platforms
 - AS-interface devices
 - DeviceNet devices
 - Conventional I/O devices
 - IO-Link devices
- Wireless Link key features supported
 - Easy device setup and deployment
 - Advanced diagnostics for on-off valves
 - Alarms; including switch count, open/closed stroke limits

The Stonel Wireless Link Android application is available at the [Google Play store](#) by searching Valmet downloads and “Stonel Wireless Link”. The Android application supports all Android devices versions 9 and above, including devices such as the Samsung Galaxy and Goggle Pixel. More information regarding the Android application can be found on our [website](#). The updated Wireless Link guide will be available in Q2 2025. The Wireless Link tool download is free!

If you have any questions, please do not hesitate to contact me, Kevin Hufnagle, or your Area Sales Manager.

Best Regards,
