PRODUCT UPDATE BULLETIN PUB #10541

Stonel™ Eclipse™ EC-series IP69K testing complete

Dear Business Partner,

I am writing to inform you of important updates to the Stonel Eclipse EC-series regarding IP69K testing status. The IP69K testing on the EC enclosure has successfully completed and IP69K marked product will begin shipping by Q1 2026. The Eclipse EC models 30, 34, 35, 96, and 97, including the Wireless Link models EC30W and EC97W will now be updated to include IP69K for the enclosure rating. The IP69K rating means the EC can withstand intensive cleaning and washdown with high-pressure and high-temperature jets. IP69K is typically required for industries where cleanliness is a primary concern, such as the food and beverage industries and pharmaceutical applications.

To note, we will begin to phase out Eclipse EN and EG models by mid-2026. Some of the Eclipse EC features over the EN or EG include:

- Screw-on cover
- Higher enclosure rating: IP69K
- Lower profile
- Automatic PNP/NPN input card selection
- Wireless Link option (EC30W)
 - Easy setup and maintenance
- IO-Link with Advanced diagnostics (EC30)
 - Cycle count alarm - exceeding a threshold.
 - Closed or open Stroke time alarm - exceeding a max or min time threshold.

To learn more about the Eclipse EC please visit our Website: [Stonel™ Eclipse™ compact limit switch | Valmet](#)

A detailed phase-out plan for EN and EG models will be provided in the upcoming months. If you have questions on the life cycle status of these products or need help with selection or ordering, please contact me or Kevin Hufnagle.

Best Regards,

Bruce Domino, P.E.
