PRODUCT UPDATE BULLETIN PUB #10543

Stonel™ Eclipse™ EN and EG models phasing out in 2026

Dear Business Partner,

I am writing to inform you of important updates to Stonel Eclipse EN and EG life cycle status. The EN/EG Eclipse models are phasing out in 2026 and will be moved from "Active" to "Support" in 2026. Please start ordering EC models moving forward. Some notes:

- A conversion list is available to convert existing EN/EG models to EC models.
- EC mounting kits are also available as the EC series requires different mounting kits than EN/EG models.
- EN and EG models will not be available to order from the factory after September 30th, 2026.
- The models for DeviceNet will not be supported in the EC. Customers using DeviceNet should order EN92/EG92 models needed for future support.

The new Eclipse EC models are available with Haz Loc approvals and additional features such as diagnostics and IO-Link. Some of the Eclipse EC features over the EN or EG include:

- Screw-on cover and lower profile
- Push button settings
- Higher enclosure rating: IP69K
- Automatic PNP/NPN input card selection
- Wireless Link option (EC30W & EC97W)
 - Easy setup and maintenance
- IO-Link with Advanced diagnostics (EC30 models)
 - Cycle count alarm - exceeding a count threshold.
 - Closed and open Stroke alarms - exceeding a time.

To learn more about the Eclipse EC please see PUB-10440 and PUB-10541 and visit our Website: [Stonel™ Eclipse™ compact limit switch | Valmet](#)

If you have questions on the life cycle status of these products or need help with selection or ordering, please contact me or Kevin Hufnagle.

Best Regards,

Bruce Domino, P.E.
