

Your preferred partner for valve automation

When you have automated valve requirements, partner with Valmet for the full scope of valve controllers and actuators to complete your assembly. Why? To ensure the best possible valve performance.

A full portfolio awaits at your one-stop-shop for all things valve automation. Select individual components or create a full solution from our extensive offering:

- Actuators
- Valve controllers
- Positioners
- Limit switches
- Instrumentation

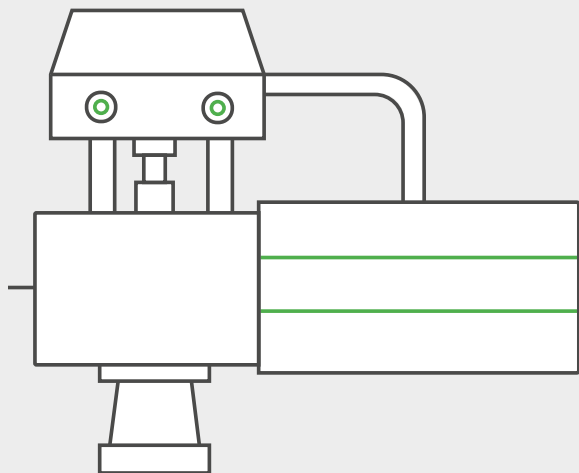

Our devices feature field-proven technologies and are guaranteed to meet relevant performance and environmental regulations regardless of the original valve manufacturer. For your control, emergency shutdown and on/off valve applications, find the right components readily available from Valmet.

Components you need to automate your valve

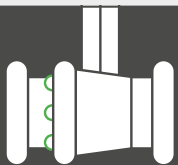

Valve controllers

- Neles™ and Stonel™ valve controllers (for control and on/off valves)
- Neles™ intelligent safety solenoids
- Neles™ Easyflow™ and Stonel™ limit switches

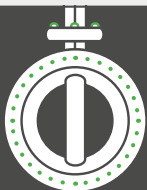

Actuators

- Neles™, Neles™ Easyflow™ and Jamesbury™ pneumatic actuators (linear and rotary)
- Neles™ hydraulic actuators
- Valvcon™ electric actuators
- Neles™ Easyflow™ linear cylinders
- Neles™ Easyflow™ instrumentation components

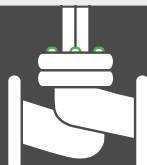

Valve automation

Ball valves

Butterfly valves

Linear valves

Your valve

- Any valve type
- Control or on/off
- Rotary or globe
- Pinch or knifegate
- Other applications
