

Mission-critical flow control solutions

Efficiency, safety and sustainability

Valmet, through its extensive product offering, is a global leader in flow control solutions and services. We provide mission-critical valve, pump and valve automation technologies to all process industries including: bioproducts, refining, chemicals, renewable energies, gases, mining, metals, pulp and paper. All our products are supported globally by dedicated expert services.

Known for reinventing reliability

Our valves, pumps and valve automation solutions have been known for decades for their high quality, reliability and safety. We set the standard for sustainable performance. We engineer, manufacture and sell flow control solutions under the Neles™, Jamesbury™, Stonel™, Valvcon™ and Flowrox™ product brands.

As the requirements on industrial flow control solutions continue to evolve, our devices continue to grow in intelligence and the degree of valve automation. This allows for accurate process optimization and the effective planning of preventive maintenance.

Based on knowhow and experience

Valmet's flow control solutions are backed by more than a century of experience and expertise. Safe and reliable performance comes from continuous innovation and product development paired with field-proven performance in some of the most demanding industrial applications and environments. Over the years we have perfected our manufacturing quality to the highest standard.

Our services also benefit from our experience. We recognise that reliability leads to higher availability, safety and ultimately better profitability. This is why we work together with our customers to ensure even and predictable long-terms performance with no surprises.

We base our business on a century of flow control expertise

1920	1950	1980	1990	2000	2010	2020	FORWARD
1923 Machinenfabrik Augusburg-Platting AG / MAPAG founded	1956 Neles founded	1982 Neles acquired by the predecessor of Metso 1988 Jamesbury acquired	1999 Metso created through merger of Rauma and Valmet	2000 StoneL acquired 2001 Valvcon acquired 2008 MAPAG acquired	2012 Valstone acquired 2012 ExperTune acquired 2013 Metso and Valmet created through demerger 2018 Rotex valve automation acquired	2020 Neles created through partial demerger from Metso 2021 Flowrox Valves and pumps acquired 2022 Flow Control business line of Valmet	

World-renowned brands

Valmet's portfolio of flow control solutions is packed with brand names recognized across industries and applications. Over the past 100 years, our brands have become synonymous with reliability, quality and high performance.

Flow control brands that have reinvented reliability

Neles™

Jamesbury™

Flowrox™

Valvcon™

Stonel™

Trust your valuable end products and process media to flow through our industry-leading valves.

Accuracy, speed and repeatability are core values attributed to our actuators.

Valve automation and added intelligence bring predictability to any valve, regardless of manufacturer.

Services that deliver measurable benefits

Our services consist of much more than just maintenance and mechanical repairs. We ensure on-time delivery of spare parts and services, cost savings through continuous optimization and longer life cycles for your pumps and valve assemblies. Our services exist to help you prevent valve failure and costly downtime. Our digital capabilities allow for predictive maintenance, continuous monitoring and automatic analysis – to optimize your resources. We work with you to protect and improve your process performance.
