- **EUR 100 million cost competitiveness program successfully implemented in 2013–2014**
 - Higher than planned capacity cost savings
 - Headcount reduction since Q3/2013 >1,600 employees
- **In 2014–2015, capacity cost will be flat**
 - Despite slightly growing headcount and growth investments in some areas

Quality costs (EUR million and % of net sales)

By the end of 2016, quality costs reduced by 50% compared to 2012 baseline

- **Implement Lean**
 - Launch Valmet Lean program
 - Provide Lean training for a wide group
 - Define and set up Lean measurement system
 - Each business line and area to have Lean projects
- **Reduce lead times**
 - Utilize Value Stream Mapping and Visual Management
 - Identify and eliminate waste
- **Reduce quality costs**
 - Consolidate quality feedback systems as feasible
 - Emphasis on finding root causes and implementing corrective action

1) Capacity cost means total fixed type of own costs which generally do not vary with production levels and which are based on present normal capacity, e.g. wages & salaries, rents & leases, estates & equipment, travel, common functions, telecom expenses, insurances and other outside services

Cash flow, net debt, gearing and equity ratio

Cash flow provided by operating activities (EUR million)

Net debt (EUR million) and gearing (%)

Equity to assets ratio (%)

- CAPEX excluding business acquisitions (EUR -11 million) less than depreciation (EUR -14 million)

- Gearing (28%) and net debt (EUR 229 million) increased due to the acquisition of Automation
- Equity to assets ratio at the same level as in Q2/2015

Net working capital development

Net working capital and orders received (EUR million)

Historically, net working capital has been on average -9% of rolling 12 months orders received

- Net working capital EUR -244 million, which equals -10% of rolling 12 months orders received
- Net working capital has always been negative
- Single big orders have a significant influence on variation of net working capital

Foreign exchange risk management in Valmet

- All operating units are required to hedge in full their foreign currency exposures
- Hedging takes place when firm commitment arises or at the latest immediately after operating units have reported their monthly currency exposure
- Valmet is not hedging any translation risk arising from subsidiaries' equity
- Intra corporate dividends, loans and deposits shall be hedged when internal decisions have been made
- Treasury acts as an internal bank for subsidiaries and manages corporate wide foreign currency exposure by hedging Corporate level net exposure towards banks

Foreign currency exposure

- The exposure is a net of all assets and liabilities denominated in foreign currencies derived from sales and purchase contracts, projected cash flows and firm commitments
- A 10 percent appreciation or depreciation of EUR against all other currencies would have an effect of, net of taxes, -/+ EUR 1.5 million on EBITA

Split of net sales and costs per currency in 2014

Net sales by currency (2014)

Costs by currency (2014)

- Sales and costs in different currencies fairly balanced
- More costs than sales in EUR, vice versa in USD

Net sales and profitability development, annual

Net sales and EBITA before NRI (EUR million)¹

- Timing of large projects has had an impact on the level of net sales
- Good stimulus-driven demand in China 2009–2010 supported orders
- The paper machine market has shifted to smaller and lower-cost machines
- In 2013, the power generation market was affected by low-cost shale gas and political and economical uncertainty in Europe
- Profitability improved in 2014 as a result of cost savings

Market environment

- Large installed base to be served
 - Opportunities in customer agreement based business
- Growth opportunities in increased outsourcing
- Capital project opportunities in tissue and board
 - Technology project activity at high level currently
 - Bio project activity strongest in Lignoboost and second generation lignoboost

Market position & competition

- Strong position and market share in Valmet's targeted technology businesses.
- Well established services business
- Key competitors Voith, Andritz and US services companies (Albany, Xerium, Kadant, GLV, Asten J.)

Actions for Valmet

- Continue to develop and grow Valmet's Services business
- Make sure Valmet wins paper and tissue projects
- Strengthen Valmet's position in pulp rebuilds
- Commercialize biotechnology (lignoboost, pre-treatment and bio-coal)

Automation business line figures included as of Q2/2015.

 - Continued pulp mega mill projects planned
 - 2nd generation ethanol emerging
- Services growth potential
 - Installed base and leaner customer operations
- Growing interest and pipeline for optimization projects, e.g. energy, chemicals savings; operations and availability of equipment).

Market position & competition

- Fierce competition in new pulp projects
- Strong competition with local and global players in all markets in Services, Paper and Energy
 - Local presence and solutions important

Actions for Valmet

- Keep market share and improve the profitability and risk-return profile of large pulp projects
- Grow the services business by offering new products and service solutions
- Develop solutions and costs to compete in bioenergy plants.
- Further develop Valmet's local capabilities

Market position & competition

- Valmet has a strong position both in technology business and services
- Consolidation of smaller distressed players and increasing competition in mid-market
- Increased competition in past few years

Actions for Valmet

- Grow Services with Key Account Management agreement based business and new products. Strengthen pulp and power services
- Strengthen position in technology business: cost competitiveness and rebuild competences
- Commercialize new biotechnologies and expanding the served power market
- Localize selected capabilities outside Nordics

- Developing services market with growth potential
 - Increased installed base

Market position & competition

- Valmet has a strong position in Paper. Recent successes with modular board machine (OptiConcept M)
- Continued competition: new competitors in mid-size segment, local competitors strengthening through partnering with western companies
- Large Valmet installed base

Actions for Valmet

- Continue to develop and grow Services: local low cost sourcing of consumables, agreement business and spear head products
- Further market penetration of OptiConcept M, tissue and mid-market fiberline
- Competitive, lower cost, local offering and increased local capabilities (application, engineering and project management)

Valmet with Automation

Increased stability and improved profitability

Illustrative net sales in 2014¹

Improving profitability

- Automation has a solid financial track record
 - Historically continuous double-digit EBITA margin of 10–12%
 - Stable net sales, with slight growth
- Increases Valmet's profitability
 - Valmet's financial target: EBITA margin of 6–9%

Increasing stability

- Valmet will have approximately EUR 1,300 million of stable business
 - Existing services EUR ~1,000 million
 - Automation EUR ~300 million

Automation offering

Distributed Control System (DCS)

- Complete control system platform for several processes: process, machine, drive controls and information management
- Used for monitoring and controlling distributed equipment in process plants and industrial processes

Quality Control System (QCS)

- A system that controls process quality
- Integrates process quality management, measurements and profilers

Profilers

- Profilers control the process as part of the QCS system

Analyzers and measurements

- Equipment that analyzes and helps optimize the process
- Equipment that measures different variables in industrial processes, e.g. consistency in pulp and paper processes

Vision systems

- High resolution and high speed digital imaging technology, e.g. pulp or paper web inspection and web break analysis system
- The system improves process runnability and end product quality

Performance solutions

- Advanced process controls for process optimization
- Condition monitoring in paper, power and process plants
- Systems for simulating and analyzing industrial production processes

Market drivers

- Investments in new pulp and paper machines and power plants
- Ageing machines and installed automation systems

Business focus and opportunities

- Customers choose an automation provider even for more than a decade
- High service business content (~45%)
- On Valmet level, full scope offering gives better differentiation from competitors
- Combining Valmet technology, process know-how and automation offers growth possibilities and potential to create new solutions for customers

Comprehensive life-cycle services offering

Over 2,000 customer mills and plants served globally

Spare and wear parts

- All OEM spare parts and standard parts in Valmet deliveries
- Inventory management services and process parts, such as consumables and auxiliary products

Fabrics

- Paper machinery clothing
- Filter fabrics used in the pulp and paper, mining and chemical industries and power plants for various filtration purposes as well as in commercial laundries

Mill and plant improvements

- Plant upgrades
- Modifications and environmental improvements
- Troubleshooting
- Shutdown maintenance
- Maintenance outsourcing for the entire customer plant

Roll and workshop services

- Maintenance services on rotating equipment: roll covers, spare rolls and roll upgrades
- Rebuilds for all manufacturers' board, tissue, pulp and paper machines
- Workshop services: pressure part manufacturing, boiler component services, parts to protect and enhance boiler performance and fiber equipment refurbishing

Energy and environmental

- Services for evaporation plants, power and recovery boilers, and environmental equipment

Continuous investment in research and development to improve customers' processes

Customers' needs

- Increase production efficiency
- Improve competitiveness
- Maximize value of raw materials
- Widen raw material base
- Provide high-value end products
- Develop new innovations and technologies

Valmet's R&D focus

- Modularized and standardized products
- Energy, water and raw material efficiency
- Automation technology
- Biomass conversion technologies

Valmet's R&D resources

- Own R&D centers and pilot facilities
- Annual R&D spend about EUR 50 million
- Around 1,800 protected innovations
- Cooperation with universities and research institutions

Example of our R&D work - OptiConcept M board and paper machine

- Cost-efficient, high-quality, safe and flexible board making concept
- Significant savings in energy, water and raw material use
 - Energy efficiency improvement up to 30%
- Modular and compact size
 - Short delivery times, quick start-ups, and less production space
- Functional design brings increased safety and accessibility
 - Design acknowledged in Finnish design competition in 2014

■ Valmet
■ Others

Valmet is well prepared for the cyclical nature of the business

- Own capacity has been reduced during the last few years
- Capacity cost reduced 10% in 2014
- Capacity cost to net sales was 24% in 2014

1) Market size based on orders received. Includes all pulp business units, recovery boilers, and evaporation plants

Consumption development

Growth in board and tissue consumption is expected to continue while newsprint is declining

Paper and board consumption growth trends

Paper and board consumption per capita vs. population¹

Average global consumption: 53 kg per capita

Population growth in emerging markets is larger than in developed markets

Level of consumption per capita in emerging markets clearly below that in developed markets

This offers us long-term growth potential

1) Source: PPI Annual Review 2013 (2012 figures)

Demand has shifted more towards smaller paper and board machines

- We are focusing more on modularized and standardized solutions
- Competition is higher in smaller machines
